

## Data use and citation

UshauriKilimo is pleased to make available a range of agro-advisory services as open data. You are most welcome to use the free datasets in accordance to the open access policy.

Agro - Advisory Services were compiled using datasets obtained from questions and answers which are being provided by farmers and agricultural extension officers respectively. The agricultural extension officers involved are from Kilosa District. UshauriKilimo agro-advisory service is a product of research funded by EPINAV under researchers from Sokoine University of Agriculture and Norwegian University of Life Sciences (UMB).

You are welcome to use the shared agro-advisory service but you should be aware that the assessment of the accuracy and applicability of each advisory is strictly a USER RESPONSIBILITY; SUA takes no responsibility for problems that may arise from use of the service.

To acknowledge the scientists and/or organisations that have provided data or products, we request that you include a bibliographic citation to all materials supplied through UshauriKilimo.

We request that you send us one reprint (or a PDF copy) of any publication that uses data received from our UshauriKilimo; if reprints are not available please send a bibliographic citation or URL of your work through [csanga@gmail.com](mailto:csanga@gmail.com). This will help us to determine the type and level of use of the data we distribute and keep our service-related references up to date.
